SUMMARY

Frontend-focused Software Engineer with 4+ years of experience delivering scalable React and Angular applications for US and European clients. Proven record of improving application performance by up to 40% through optimization, accessibility (WCAG 2.1), and modern frontend practices. Strong experience across frontend, backend (Node.js), and cloud-native environments, with a focus on high-quality, maintainable, and GDPR-compliant solutions.

EXPERIENCE

AI Frontend Engineer Intern

Jan 2026 - Present

NexCell Solutions

London, UK

- Implementing TanStack Query for efficient server-state management, caching and background synchronization, significantly reducing unnecessary API calls and improving perceived application speed.
- Teamed up with a small, cross-functional team in a fast-paced startup-style environment.
- Optimizing the frontend architecture for scalability and maintainability, leveraging modern React patterns and Next.js optimization features to handle high-frequency data streams in a fast-paced startup environment.

Fullstack Software Engineer (Systems Engineer)

Apr 2023 – Dec 2024

Tata Consultancy Services

Pune, India

- Engineered high-performance frontend applications using React and Redux, implementing lazy loading and virtualization to reduce page load times by 25% and increase user engagement by 40%.
- Optimised Webpack bundle configurations to cut initial render time by 1.2 seconds, elevating Core Web Vitals and overall application performance.
- Led end-to-end software development lifecycle (SDLC) for key features, collaborating with two cross-functional engineers to deliver 100% of milestones ahead of schedule, recognised with the **On the Spot Award** for exceptional dedication and contributions to team and organisational goals.
- Conducted 20+ comprehensive code reviews and introduced Jest snapshot testing, increasing test coverage from 60% to 85% and cutting production defects by 40%.
- Developed cloud-native Node.js microservices with Redis caching, reducing API response times by 35% and strengthening scalability of legacy Java and Groovy components.
- Collaborated with US-based stakeholders to implement WCAG 2.1 accessibility standards and deliver GDPR-compliant web solutions.

Associate Software Engineer

Nov 2020 - Mar 2023

Prolifics

Pune, India

- Authored and maintained 4+ responsive Angular and React applications using mobile-first principles, refining page performance and load efficiency by 30%.
- Revamped reusable UI components in Angular and React, strengthening code maintainability and decreasing feature development time by 25%.
- Influenced CI/CD pipelines and achieved 85% unit test coverage using Jasmine and Karma, lowering production bugs by 35%, earning the **PEP (Performance Excellence and Performance) Award** for consistent high-impact contributions.
- Mentored three junior developers through regular code reviews, improving pull request approval rates by 50%, and led accessibility audits for European client applications.

TECHNICAL SKILLS

Frontend: React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Next.js

Backend: Node.js, Express.js, RESTful APIs, Microservices, Java (basic), Groovy (basic)

Databases: MongoDB, Redis

Cloud & DevOps: Azure, CI/CD pipelines, Docker, AKS (basic)

Testing: Jest, Jasmine, Karma, JUnit

Tools & Practices: Git, Postman, VS Code, Agile/Scrum, SDLC, Accessibility (WCAG 2.1)

Portfolio & Personal Projects: <https://my-portfolio-phi-three-99.vercel.app>

EDUCATION

University of Leicester

Msc.Cloud Computing.

UK
Expected Graduation: July 2026

Pune University

Bachelor of Engineering in Computer Engineering

India
Graduated: May 2020
